MODULE TWO

Hazard and Risk Assessment: The process and how to use it as a foundation for plans

The second module in MAMEC's new MEC Certification series focuses on Hazard Risk Assessments (HRA). In addition to being a requirement under the legislation, HRAs can be used to provide a solid foundation for your community's emergency management program. This course was designed for MAMEC members with input from HRA specialists and MECs like you. It will provide you with the core knowledge to develop and use an HRA. The learning outcomes of this course include:

- Understand the importance of an HRA that is developed for your community and how it can save time, resources, and money.
- Learn how to identify the hazards, vulnerabilities, and risks that exist within your community
- Learn how to tailor the assessment to meet the specific needs of your community.
- Understand how to integrate the HRA into your emergency management program.

LEARN FROM THE BEST

Our Experts

This course will be led by Dr. Patricia Martel, PhD and Certified Emergency Manager (CEM).

MAMEC Executive Board worked with a Course Developer and Educator with a Doctorate and over +15 years' experience in Emergency Management to research, develop and write these training modules. The development team also included students from the University of Winnipeg who have assisted with the research on this project.
